- Risk Management

Training Courses

Accident Investigation

This certified training course is ideal for those who are likely to contribute, manage or run accident investigations. Delegates will learn how to add structure and devise a thorough framework for making an effective system in the workplace, and how to prevent accidents from occurring or how to significantly reduce the possibility of accidents.

Working With You

TRAINING

Conflict Management - This certified course teaches techniques and appropriate body language to use to handle conflict in a calm and professional manner. Participants will acquire skills and knowledge to enable them to deal with situations when confrontation is inevitable, as well as skills in restraining and removing difficult individuals in the quickest and safest manner possible.

Health & Safety - This HSE certified Health and Safety training course is essential for the workplace, regardless of the nature of your business. This course covers the complete 1974 Health and Safety Act and revisions in 1999 and is tailor-made to the specific business or operation.

Asbestos Awareness - Our certified training course thoroughly dives into all of the relevant information required so that everyone on the course is adequately informed and armed with the right tools and response should they be likely to disturb any asbestos so that they can best protect themselves and those around them.

Construction - Our Certified Construction Skills training course provides those on the course the knowledge, skills, and safety features required to accurately and safely carry out various construction related tasks ranging from using an abrasive wheel to proper harness safety.

Risk Management - Tailored to suit the needs of your workplace or business, we provide an extensive and encompassing certified risk management course to ensure that someone on the premises can supervise dangers onsite and remove or minimise them.

First Aid at Work - If you are an employee or employer working in a hazardous environment or just someone who would like to know first aid skills and competencies, we can offer you a comprehensive certified training course that is designed to give you many of the practical skills that you may need in an emergency situation.

Manual Handling - This HSE certified training course is essential for any individual involved in manual handling in the workplace. The course teaches skills and techniques required to move and store heavy loads safely whilst avoiding accidents. This course is essential for every employer to minimise the risks of accidents and injuries from manual handling at work.

Risk Assessment - Carrying out regular risk assessments not only validate the employee liability insurance but also maintain a safe and secure environment for your employees. This course will give you the skills to complete a basic risk assessment and understand the reason for them and their importance in the workplace.

Fire Marshall Training - Our certified Fire Marshall training course is designed to incorporate all of the primary theory and practical skills required to appropriately prevent the possibility of fire or at least greatly reduce it. Guidance on various areas of competence such as, raising the alarm, how to tackle small fires, what to look for and deal with evacuation situation, to record such events and responsibilities.
