

SECURITY

SECURITY GUARDING

A Security guard presence helps to deter crime and keep intruders at bay. Our highly experienced team of uniformed security guards are adept at keeping Construction, commercial, retail and residential property safe and secure 24-7. Our uniformed guards are carefully selected to suit your contract or assignment and are suitable for a wide range of applications. We ensure our guards are fully briefed for your task and are provided with back up from our 24-hour control centre.

Concierge Services, at VIP our guards are ideal for front-of-house services for luxury apartment complexes and residential blocks. We offer a professional concierge service enabling you to track personnel and visitors in and out of your premise, deal with post and building system checks.

Retail and loss prevention services, at VIP we understand the challenges faced in a retail environment and specially train our operatives to handle conflict, react fast and take appropriate action depending on the situation. Our team are highly experienced in identifying suspicious behaviour, preventing shoplifting and protecting you and your staff from aggressive behaviour. For a more discreet service to monitor customers and staff, VIP plain clothes operatives are also available to protect against professional thieves and bulk snatchers. Construction sites, steeped high with expensive building materials and specialist equipment can be vulnerable when left unoccupied. VIP offers an experienced team of security personnel to patrol sites, ensure perimeters aren't breached and keep all assets secure. VIP can control your access control and gate house duties 24/7.

Our Promise
